Art Unit: 3736

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-31 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-15 of U.S. Patent No.

6,350,227. Although the conflicting claims are not identical, they are not patentably distinct from each other because they claims are the same except for slightly different terminology (sourcewire reel vs. sourcewire drum) and the elimination of a threaded groove and the elimination of an element and subsequent loss of its function is an obvious expedient if the remaining elements perform the same functions as before.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3736

4. Claims 1-2, 7-8, 14,16-17, 22-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Liping '383 or Van't Hooft et al '937 in view of Parsons et al (EP '004).

Liping and Van't Hooft et al disclose the claimed device except for the use of a manually operable cranking mechanism to rotate the drum and extend the source wire out of the shield capsule. Parsons et al discloses a similar device for extending a radioactive material out of a shielded enclosure and teaches that it is known to use a manual crank (7) to manipulate the radioactive material. Therefore a modification of either Liping or Van't Hooft et al to include a manual crank would have been obvious in view of the teachings of Parsons et al.
